

DROPBOX SIGN - TAG DIAGNOSTIC

Send this PDF for signature. For each row below:

- if the [bracket text] DISAPPEARS or becomes a field = that syntax is VALID
- if the [bracket text] stays VISIBLE = that syntax is REJECTED

CONTROLS (known good - must convert)

Signature:

[sig|req|signer1]

Date:

[date|req|signer1]

TEST A - INITIALS (which token converts?)

A1 singular:

[initial|req|signer1]

A2 plural:

[initials|req|signer1]

TEST B - SINGLE CHECKBOX

B1 check:

[check|req|signer1]

B2 checkbox:

[checkbox|req|signer1]

TEST C - YES / NO GROUP (pick exactly one)

C1 grouped, label inside tag:

[def:\$g1|check|req1|signer1|Yes] Yes

[def:\$g1|check|req1|signer1|No] No

C2 grouped, label as plain text outside tag:

[def:\$g2|check|req1|signer1] Yes

[def:\$g2|check|req1|signer1] No

C3 two independent plain checkboxes (no group):

[check|noreq|signer1] Yes

[check|noreq|signer1] No

TEST D - FREE TEXT

D1 text:

[text|req|signer1]

All tags above are clean single-run Courier text (no Word, no wrapping).

Whatever fails HERE is a true syntax problem; whatever works here but

failed in your Word form is a Word rendering/splitting problem in that doc.
